Southeast Mushrooms: How to Identify Them

Dates: Thurs/Sat, Sep. 13, 15 & 22
Time: Thurs: 7-8:30pm & Sat: 10am-2pm
Place: UAS Sitka Campus & Field Trips
Fee: $49

Oops!
We may cancel it because we didn’t know you planned to take it!
Sometimes excellent courses with super instructors are canceled when too many people wait until the last minute to register. Our courses have to be cost-recoverable and we need a minimum of students enrolled before a class will run. To avoid any inconvenience to students and instructors, we cancel under-subscribed courses ahead of time.

Don’t wait. Avoid disappointment.
Register early and include your payment.

To obtain a refund when dropping a class, a student must cancel at least 7 days before the class begins.
We will sometimes make an exception to this policy if the student cancels in time to be replaced by another student.
All exceptions to this policy are by permission of the Office of Continuing Education Manager only.

UAS must have all of the following information to register course participants.

Name: ________________________________
Business: ________________________________
Address: ________________________________
Phone: ________________________________
SS# or UA-ID: ________________________________
Birthdate: ________________________________
Alaska Resident? _____Yes _____No
Ethnic Origin: (optional) ________________________________

❑ Check enclosed in the amount of $ ________ made payable to UAS.

How to Identify them

Southeast Mushrooms

This course introduces students to the mushroom flora of SE Alaska. Focus will be on the use of taxonomic keys for identification of fungi and recognition of both edible and poisonous mushrooms. Cooking and preservation of mushrooms will be discussed. Field trips will be followed by in-class identification of collected mushrooms.

COURSE OBJECTIVES:
Upon completion of this course, students will be able to:

● Use a macro and microscopic key to identify mushrooms.
● Recognize several species of locally common mushrooms.
● Understand the basic biology of fungi and their role in the ecosystem.
