The James Beard Foundation and Food Tank, along with a prestigious advisory group of food system experts, developed the first annual “Good Food Org Guide.” This Guide highlights nonprofit organizations that are doing exemplary work in the U.S. in the areas of food and agriculture, nutrition and health, hunger and obesity, and food justice. Only nonprofit, scholarly, and municipal initiatives have been selected in order to spotlight efforts that are focused on community building and engagement, advocacy, and service.

The vision and objective of this annual publication is to focus attention on the dozens of nonprofit organizations (listed in alphabetical order, not ranked) who are working in fields, kitchens, classrooms, laboratories, businesses, town halls, and Congress to create a better food system. The list was determined by distinguished experts, including past recipients of the James Beard Leadership Award and food and agriculture leaders.

This annual guide was launched at the James Beard Food Conference in Fall of 2014 as the definitive guide to organizations — national and state-by-state — who are making an impact with their work.

We hope you will find this guide useful. Please let us know if there are other organizations who deserve to be listed by emailing us at danielle@foodtank.com.

A PDF of this guide will be available for download at www.jamesbeard.org and at www.foodtank.com.

About the James Beard Foundation (JBF)

Founded in 1986, the James Beard Foundation celebrates, nurtures, and honors America’s diverse culinary heritage through programs that educate and inspire. A cookbook author and teacher with an encyclopedic knowledge about food, James Beard, who died in 1985, was a champion of American cuisine. He helped educate and mentor generations of professional chefs and food enthusiasts, instilling in them the value of wholesome, healthful, and delicious food. Today JBF continues in the same spirit by administering a number of diverse programs that include educational initiatives, food industry awards, scholarships for culinary students, publications, chef advocacy training, and thought-leader convening. The Foundation also maintains the historic James Beard House in New York City’s Greenwich Village as a “performance space” for visiting chefs. In September of 2012, JBF launched the Diplomatic Culinary Partnership with the U.S. Department of State’s Office of Protocol and helped create the American Chef Corps as a way to champion American chefs abroad, promote American food products, and foster an interest in American culinary culture and history through international programs and initiatives. One such project is the next world’s fair, Expo Milano 2015, for which the James Beard Foundation is co-leading the effort for the State Department to design and produce the USA Pavilion, a global gathering of 147 countries addressing the challenges of how we will feed ourselves in the future. The pavilion, whose theme will be “American Food 2.0: United to Feed the Planet,” will showcase America’s contributions to global food security and gastronomy. For more information, please visit jamesbeard.org. Find insights on food at the James Beard Foundation’s blog Delights & Prejudices. Join the James Beard Foundation on Facebook. About Food Tank

Food Tank (www.FoodTank.com) is focused on building a global community for safe, healthy, nourished eaters. We spotlight environmentally, socially, and economically sustainable ways of alleviating hunger, obesity, and poverty and create networks of people, organizations, and content to push for food system change.

Food Tank is for farmers and producers, policy makers and government leaders, researchers and scientists, academics and journalists, and the funding and donor communities to collaborate on providing sustainable solutions for our most pressing environmental and social problems.

As much as we need new thinking on global food system issues, we also need new doing. Around the world, people and organizations have developed innovative, on-the-ground solutions to the most pressing issues in food and agriculture. We hope to bridge the domestic and global food issues by highlighting how hunger, obesity, climate change, unemployment, and other problems can be solved by more research and investment in sustainable agriculture.

Food Tank highlights hope and success in agriculture. We feature innovative ideas that are already working on the ground, in cities, in kitchens, in fields and in laboratories. These innovations need more attention, more research, and ultimately more funding to be replicated and scaled-up. And that is where we need you. We all need to work together to find solutions that nourish ourselves and protect the planet.

For more information or to schedule an interview, contact Danielle at Danielle@foodtank.com.
